

TEST LAB MANAGEMENT

Maximize the Efficiency of your Test Lab
with Peak Test Management Suite

Smart Test and Resource Planning for Product Validation

- **Optimized Resource Utilization:** Maximize test bench throughput and minimize idle times through centralized resource management, smart test scheduling and automated conflict detection - even in complex test environments with countless activities.
- **Streamlined Workflows:** Ensure reliable and traceable test processes with intelligent templates, automated business rules, individual notifications, and configurable status transitions - from test request over approval to execution including results evaluation.
- **Improved Insights:** Gain a solid foundation for strategic decisions with powerful Business Intelligence integration - create KPIs, identify bottlenecks, and build custom dashboards and reports using tools like Excel, Power BI, or Tableau.

“Efficient product development requires smart
test and resource planning”

TEST LAB MANAGEMENT

Maximize the Efficiency of your Test Lab with Peak Test Management Suite

Why Peak Solution ?

- **Many Years of Experience in Test Lab Management**
Proven expertise from numerous successful projects across industries like automotive, aerospace, and energy.
- **Mature Solution for Fast Implementation**
Ready-to-use product components and functions enable a quick and low-risk rollout with a short time-to-value.
- **Flexible Adaptation to Test Engineers' Needs**
No-code and low-code customization allow the solution to be precisely tailored to the needs of different testing domains.
- **Seamless Integration:**
Modern REST APIs support smooth data exchange with ERP, ordering and testing systems - to ensure complete interoperability.
- **Scalable by Design:** Cloud technologies and SaaS models facilitate on-demand scaling across teams, locations and workloads.
